

A FANTASTIC WEEK WITH OUR FOREIGN GUESTS

By Arianna Bossi, 2I

Our school is involved in a Comenius Project, sponsored by the EU, called "Bridges". Four classes (2A, 2F, 2G and 2I) take part in this particular adventure: it consists in writing on a blog on the net, travelling to the five other countries involved (Germany, Greece, Poland, Romania and Sweden) and hosting foreign students.

Greek, German, Polish, Romanian and Swedish students came to Italy for this project last week. They arrived on Sunday, 1st May, and some of them went to Milan. The hosts went to pick them up at Treviglio station in the evening.

When they arrived at school, on Monday, we showed them our assembly hall, where they could see a little concert performed by some Italian students. They listened to our national anthem and other songs. After a tour of our school, we went all together to the gym where we did "Rio Abierto", a kind of yoga, and then we went around Caravaggio.

All the foreign students went to Montisola and Iseo with 2A and 2F on Tuesday.

On Wednesday our guests stayed with us in our classrooms (we played Bingo) and then we went to the assembly hall to show our presentations on music. We went to the town-hall of Caravaggio, where we met the mayor and our principal, and then we went to Bergamo Alta (the Upper City of Bergamo) in the afternoon. We walked a lot, took many pictures and visited some churches with our guide.

On the ferry boat on our way to Murano

and I really hope to keep in touch with them.

But the main experience we had all together was going to Venice on Thursday: we really loved it! We visited Saint Mark's Square, the Bridge of Sighs, the Rialto Bridge and Murano too! We had some spare time to buy some presents, to visit a typical glass factory and to eat an ice-cream all together.

Unfortunately, on Friday, all the foreign students and teachers had to go back home.

I really appreciated these fantastic days with them: I met new friends, I took many photos
